Lampung, Indonesia

I am a student in the Bachelor of Informatics study program at Telkom University with a track record of discipline, quick responsiveness, and responsibility. I have high perseverance and determination to solve problems related to web development, mobile development, programming, and data analysis. I have several experiences, experiences I gained from participating in self-development events, membership in organizations, and roles on committees, those things have been able to increase my soft skills and hard skills. I am sure that ability can be an added value for the team and bring many positive contributions to overcoming various challenges in the world of informatics. I have the readiness to give my best in every project and the enthusiasm to grow with the team. I am very excited to contribute to a dynamic and innovative work environment.

Academic Experiences

Google Developer Student Clubs - Bandung   Dec 2023 - Present

Member of GDSC Telkom University
